Comment

Dr. Subramani was very clear about the objectives of the course, and was careful not to deviate. It was also important for us to remain engaged and interactive. His flexibility with assignments was always greatly appreciated. Homework assignments were returned promptly, and the grading was very fair. The presentations allowed for us to focus on particular chapters, and get more familiar with the course content.

Probably the rudest, most inconsiderate, and worst professor/teacher I have ever had by far. If he did not understand what a student/class was trying to say, he would assume that the student/class was wrong if even he had the wrong idea and it was clearly wrong. He also appear to have no respect at all to half of the students in the class. I feel like this person is a disgrace to the academic field for this and that he is narcissistic to realize what he is doing wrong.

He would grade fast, but consider he never left comments when grade would explain that. He would want to meet up the students but all the times were inconvenient.

Professor Subramani makes himself very available for his students outside of the classroom. Also, he helped a great deal when I needed to miss classes to deal with family issues.

Comment

Overall, the course was a good course.

The main book in the class had several mistakes in it, from calculations to grammar. Clearly the professor did not read any of the book before using it as a textbook. Even after the professor learn this, he would still teach directly from the book without correcting the mistakes.

This course definitely opened up a new area that I find very interesting and look forward to researching in the future.
