Approximation Algorithms

K. Subramani, LCSEE, West Virginia University

January 27, 2014

1. Set Cover

    (a) Tightness analysis.

    (b) The layering approach for vertex cover.

2. The Steiner tree problem

    (a) Problem definition.

    (b) The metric case. Definition of metric spaces.

    (c) An approximation-preserving transformation.

    (d) The MST approach.
