

Postdoctoral Position in transition metal mediated catalysis at West Virginia University.

A postdoc position is available to work on the transition metal catalyzed new synthetic methodology development and asymmetric catalysis. A Ph. D. in synthetic organic chemistry is required. Experience on methodology development and/or photo catalysis is desirable. Preferred start date is June 2012, not later than July 15, 2012. The position may be renewed in annualized increments for up to three years, contingent upon performance and funding. An initial performance review will occur 6 months from the beginning of the appointment. If interested, please send your CV emailed to Prof. Xiaodong Michael Shi at [Xiaodong.Shi@mail.wvu.edu](mailto:Xiaodong.Shi@mail.wvu.edu). Review of applications will begin in April 12<sup>th</sup> 2012 and continue until the position is filled. Please refer to <http://community.wvu.edu/~xs007/> for info about the available facilities and research in our group. WVU is an Affirmative Action/Equal Opportunity employer and the recipient of an NSF ADVANCE award for gender equity.
